### Project management

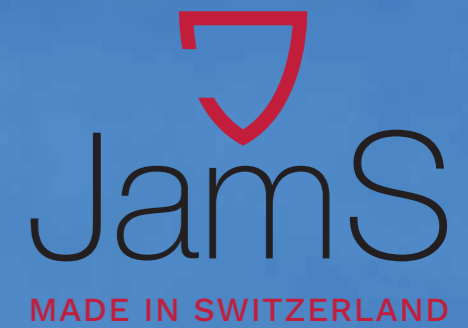

- Planning and advice
- Implementation
- Maintenance and service
- Globally active

### Special orders

- Complying with customer requirements
- Eligible technical specifications
- Flexible thanks to in-house production

### Integral security concepts

- Building installation concepts
- Planning of security systems
- Fire protection concepts

# Optimum Security Against Mobile Signal Threads

JamS AG

Seidenhofstrasse 14 | 6003 Lucerne | Switzerland | Phone +41 41 511 82 40 | [contact@jams-ag.ch](mailto:contact@jams-ag.ch)

## About us

JamS AG was founded in Switzerland, and develops finished innovative jamming solutions in line with customer's requirements.

We provide of more than 20 years experience in the area of jamming, security and integral building technology. We have developed jamming solutions in our own in-house research & development department for the following sectors:

Reactive jamming inside and around prisons

Convoy jamming for VIP transports

Tactical infrastructure jamming for anti-terrorism and SWAT units, presidential guards, etc.

Drone jamming for sensitive buildings or infrastructures, such as prisons, stadiums, open air concerts, government institutions, etc.

Our technology is fully developed, manufactured and "Made in Switzerland". Our name stands for the highest global standards in the sector.

JamS AG has developed its own components for all levels of a jamming system. The modular structure enables us to designs every system exactly to the customer's requirements. The technology, the design and the expertise of JamS AG has been tested numerously under extreme conditions in the last 20 years, and it convinces our customers worldwide. This expertise is the property of JamS AG, which has also signed binding contracts with the only developer of the systems as part of a cooperation agreement. With our systems, the most different signals can be jammed:

GSM-R, TETRA, TETRAPOL, UHF, VHF, FM, FM Info, AM, T-DAB, TDVB, ISDB-T, GSM P900, DCS, UMTS, LTE, etc.

JamS AG is the optimum partner for advice, planning, development, implementation and maintenance. It is important to us to maintain long-term customer relations. For this reason, we also ensure that our products are continuously maintained and serviced.

## Portable

JamS AG manufactures portable jammers for interior and exterior areas according to customer requirements for both, people in smaller versions and for conference rooms with larger designs. The client determines the exact specifications, such as size, power supply, transmission power and the signals to be jammed. We develop every device according to individual specifications.

### Areas of application

Anti-terrorist units

SWAT units

Military

Personal security

Conference rooms

Embassies

## Installed

In sensitive buildings permanently installed jamming systems can be used. JamS AG offers solutions for various type of usage and applications. With our technology the jammers are only switched on and activated, when there is an interfering signal or when a signal is deactivated. This ensures that jamming signals are not sent permanently.

### Areas of application

Prisons

Military complexes

Presidential palaces

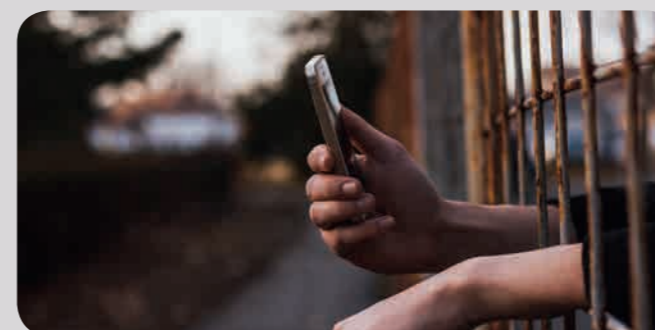

Government buildings

Conference rooms

Embassies

Universities

Research Buildings

## Convoy

The requirements of jammers are very high for the transportation of VIPs. JamS AG equips their vehicles according to their needs with the necessary technology, and guarantees their maintenance and amplification during the entire lifetime. The equipment is developed and implemented specifically for every type of vehicles according to the customer's requirements. We focus on the highest quality requirements and comfort.

### Areas of application

Presidents

Government officials

VIP

SWAT units

Military

## Security Concept

JamS AG produces integral security concepts for entire building infrastructures. We coordinate all mechanical trades (heating, ventilation, air conditions, electrical installation) and take the best cost-benefit ratio into account. Security concepts with fire alarm, video surveillance, access control and burglar alarm systems complement our offer.

### Areas of application

Embassies

Government buildings

Military complexes

Office buildings

Data centres

Universities

Research Buildings

## Service

JamS AG offers a complete one-stop service. Professional, solution-oriented and highest Swiss quality.
